

**Enterprise-class data centers** require sophistication in design, management, visibility, compliance, and scalability to support a wide variety of client IT needs. Our solution leverages best-of-breed technologies to furnish enterprises with **complete access, collaboration, and managed data capabilities** across their entire communications infrastructure.

**Our Enterprise Data Centers** deliver:

- Tier-3+ availability, with uncompromising security, reliability, and control supported by industry-leading Service Level Agreements (SLAs).
- High level of compliancy - PCI, HIPPA, HI-TRUST, ISO, SSAE 16, SOC 1 and SOC 2
- Six-tiered security perimeters, fully monitored 24x7, with on-site live hands support.
- Customizable and scalable solutions to ensure ongoing business support infrastructure reliability

With dedicated Fortune 100 specifications from 21 to 200+ cabinets, each enterprise data center solution includes **tech space, secure storage, and workplace recovery facilities** to ensure business continuity.

**Micro Data Centers**

Micro Data Centers provide the highest level of security and compliancy in a **dedicated and secure facility, housed within a larger, completely fortified infrastructure warehouse** that provides the resiliency and privacy. Each is custom-designed and outfitted to provide a unique, single-client environment with dedicated power, cooling, fire suppression, and security - leveraging an already proven, highly resilient data center 'shell'. Each Micro Data Center is a fully demised, Tier 3/2N MEP infrastructure, featuring a dedicated, steel-mesh design. Each suite meets or exceeds SSAE 16, SOC 1 and SOC 2 standards with PCI, HIPAA, HI-TRUST, ISO compliant designs. Due to the highly customizable capabilities of the solution, power densities range from medium to high, averaging 16 kW+

per facility. Client facilities are fully monitored 24 x 7, feature a two-form biometric security access system, and have access to on-site live hands to ensure near real-time responses on any matter that may occur. **All Service Level Agreements are ensured and insured by Travelers Insurance**, offering anywhere from \$50K to \$500K guaranteed uptime capabilities.
